SUMMARY

Front-end developer specializing in React, Next.js, and modern UI development. Engineered and deployed production-ready applications leveraging OpenAI APIs, real-time data processing, and performance optimization. Focused on creating fast, intuitive user experiences and scalable frontend architectures that improve engagement and usability.

WORK EXPERIENCE

Skinstric AI — Frontend Engineer (Contract)

skinstric-app-tau.vercel.app | github.com/markwaldron7string/Skinstric-App

- Engineered a real-time skin analysis platform using OpenAI Vision API and Next.js, achieving 98% detection accuracy
- Developed high-performance, responsive UI using TailwindCSS and GSAP, increasing engagement by 60%
- Optimized application performance, reducing processing time to under 2 seconds
- Architected modular component systems enabling scalable UI development and rapid iteration
- Implemented image processing pipelines improving detection accuracy across diverse real-world conditions
- Reduced UI render latency through component and state optimization

Progressive — Underwriting Consultant / Sales Specialist

2019 – Present

- Led support operations for a team of 10–15 specialists, improving onboarding and training efficiency
- Managed high-volume case resolution in a fast-paced environment requiring accuracy and compliance
- Selected as mentor for onboarding and training new hires
- Ranked #1 sales agent (Cleveland region, October 2020) and consistently exceeded performance metrics
- Collaborated across cross-functional teams, demonstrating strong communication and problem-solving to resolve complex cases and improve internal workflows
- Handled 50+ customer interactions daily while maintaining high accuracy and compliance standards

PROJECTS

The Wicked Woods Equestrian Center

April 2026 - present

thewickedwoodsec.com | github.com/markwaldron7string/wicked-woods

- Designed and developed a production website for a real-world business using Next.js, delivering a modern and scalable user experience
- Engineered a user-focused interface improving navigation and customer engagement across key site interactions
- Delivered a fully responsive experience across desktop, tablet, and mobile devices, improving usability across multiple screen sizes

Summarist Library App

February 2026 - April 2026

advanced-virtual-internship-pied.vercel.app | github.com/markwaldron7string/summarist

- Developed a full-featured web application with subscription tiers and gated premium content
- Implemented mock payment flow simulating real-world SaaS functionality and user upgrade workflows
- Integrated Firebase authentication for Google and guest login
- Engineered audio playback features and dynamic content rendering for an interactive user experience

SKILLS

Languages: TypeScript, JavaScript, HTML, CSS

Frameworks: React, Next.js, TailwindCSS, Firebase

Libraries: Redux, React Query, Zustand, GSAP

Tools: GitHub, Vercel, Netlify, Vite, Figma, VS Code, Jest

EDUCATION

Frontend Simplified — Certificate (2026)

University of Toledo — Film & Music Studies (coursework)
